

KRISSY USA

Providing solar energy to local superheroes
- first responders - in Massachusetts.

"Solving global issues is something I want to dedicate my life to, specifically the issue of global climate change. The world is always getting smaller as people become more connected, yet our understanding of each other's cultures and ways of thinking is not growing nearly as fast. In order to be successful in this new world, I think understanding will be increasingly important. This learning environment is unparalleled in the classroom and I am thrilled to be able to partake."

Born in
the USA.

Speaks
English
and
Japanese.

Attended
Phillips
Exeter
Academy.

2014
Joined
the GCI
community
at the
Summit.

2015
Started
at Clark
University.

2016
Won first
place at
the StartUp
Worcester
Program.

2017
Became a
TA at the
Summit.
